

## CREATE A LOCAL PRESENCE: GEOGRAPHIC NUMBERS

Geographic numbers, e.g. 0207, will give you a local presence. For example, you may be based in Birmingham but want to be perceived as having a London location.

- We supply numbers for any UK geographic region – we can even complement your number with a Money Penny city centre Mailing Address.
- Calls are charged at standard calling rates, with no extra cost to you.

## HAVE A NATIONAL IMPACT: 0845 & 0800 NUMBERS

These types of numbers are increasingly accepted by the public as business numbers that offer tangible benefits, which your clients and callers will appreciate.

- Calls to an 0800 number are free to the caller. Calls routed directly through to Money Penny do not incur any call charges whatsoever.
- Calls to an 0845 number are charged at your provider's local rate, again with no additional charges to your business.

# Local and National Telephone Numbers

You automatically receive one free 0845 number when you join Money Penny. This is to divert your calls to. Additional local and national numbers are available for you to use for your business as a whole or just for certain projects. They are also ideal for tracking the effectiveness of your marketing campaigns.

You control where your geographic, 0845 or 0800 number is answered - it can be routed to your own business line or Money Penny. This number is simply linked to your Money Penny screen and answered in the same way as your existing line, or in a different way if combined with an Additional Line.

### Key Facts:

- Choose a number that suits your needs 0800, 0845 or anywhere in the UK
- Your new number can be activated immediately

### Costs:

A geographic number - £10.00 per month
